

# ONOSOJI O. ONONUGA

Programme assurance · AI governance · Institutional capability

Delivery experience across London · Lagos · Frankfurt · Johannesburg

## PROFESSIONAL SUMMARY

More than twenty-three years of practice across software testing, quality engineering, programme assurance and technology governance. The work focuses on how leaders obtain defensible evidence, govern complex delivery and retain meaningful control over the systems and intelligence capabilities on which their institutions depend.

## CURRENT BODY OF WORK

| Field                    | Public expression                                                                                     |
|--------------------------|-------------------------------------------------------------------------------------------------------|
| Quality and assurance    | Testing leadership, programme assurance and evidence-ready delivery.                                  |
| Intelligence Sovereignty | A governance, assurance and resilience framework for critical intelligence dependence.                |
| Institution building     | Cereark, Testing Academy and professional capability development.                                     |
| Executive operations     | Executive Office and Operating System for memory, decisions and controlled intelligent-agent support. |
| Publishing               | Papers, playbooks, essays and public records with explicit status, provenance and dates.              |

# SELECTED PUBLIC RECORD

**The following items are publicly inspectable. Confidential client and programme history is not disclosed or implied.**

## 23+ YEARS OF PRACTICE

Software testing, test leadership, quality engineering, programme assurance and governance across complex and regulated technology change.

## TESTING ACADEMY · FOUNDED 2006

Across two decades of operation, Testing Academy is estimated to have trained between 1,800 and 2,200 delegates. Delegates progress to ISTQB certification, and many move into software testing and quality roles. Alumni remain connected through active communities, peer support and periodic meet-ups.

## ANST ANNUAL CONFERENCE KEYNOTE · DELIVERED 6 DECEMBER 2025

**AI and the Full Software Testing Lifecycle: Replacement or Revolution?** examined how AI changes testing work while increasing the importance of assurance, evaluation, judgement and professional responsibility.

## INTELLIGENCE SOVEREIGNTY PAPERS · PAPER NO. 1

**From Digital Trust to Intelligence Sovereignty**, Public Consultation Edition v1.1, is the canonical public paper. It develops the progression from software testing and quality assurance to AI Assurance, Intelligence Assurance and Intelligence Sovereignty. The wider assessment method, maturity model, certification and public comparison remain under controlled development.

## TESTING LEADERSHIP PLAYBOOK

**Testing Leadership for Project and Programme Managers** is a Cereark playbook for evidence-ready delivery, adequate testing provision and leadership decisions throughout the delivery lifecycle.

## CEREARK AND EXECUTIVE OPERATIONS

Cereark is the commercial and institutional platform for assurance advisory, publications, capability building and products. The Executive Office and Operating System applies controlled records, commitments, decisions and intelligent-agent support to executive work.

# ENGAGEMENT & CONTACT

## AREAS OF ENGAGEMENT

Programme testing and assurance · AI governance and Intelligence Sovereignty · Institutional capability building  
· Executive briefings and keynotes · Evidence-ready transformation.
